### **DETAILED ACTION**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. The submitted search report and submitted prior art have been considered.
3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1-13 are pending.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of "type" in the claims such as in claim 1, line 5, claim 1, line 6, etc., renders the claims indefinite. Note that changing "type" to "kind" or "species" does not correct the indefiniteness.

Art Unit: 3683

See MPEP 2173.05(b) under the heading "Relative Terminology", subheading "E. Type" wherein it is stated that the addition of the word "type" to an otherwise definite expression extends the scope of the expression so as to render it indefinite. Ex parte Copenhaver, 109 USPQ 118 (Bd. App. 1955).

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 95/33631 to Heinzelmann et al which corresponds to submitted DE 4420116 A1 listed as a category X reference on the submitted Search Report.

Applicant should note that the examiner has requested a translation of the above applied WO non-English reference from STIC within the USPTO and intends to attach a translation with the next office action, if available. Should applicant obtain a translation independently of the USPTO, a copy of it should be forwarded to the examiner for inclusion in the file.

9. Claims more specific to instant Figs. 1-3 would receive favorable consideration.

10. In the drawings, boxes 3, 4, 6, 10, 17, 29 should be labeled. For example, box 10 should be labeled as "Control System".

11. Any inquiry concerning this communication should be directed to Exmr Butler at telephone number 703-306-4167.
